**DETAILED ACTION**

1. This action is in response to the papers filed March 27, 2006. Currently, claims 1-6, 10 are pending.
2. The declaration filed March 27, 2006 has been thoroughly reviewed and considered persuasive.

***Reasons for Allowance***

3. The following is an examiner's statement of reasons for allowance.

The claims are drawn to a method of identifying a human subject having an increased risk of developing colon cancer by detecting CLN3 gene wherein up regulation of the CLN3 gene identifies a subject as having an increased risk of developing colon cancer.

The claims have been limited to human subjects and colon cancer. The instant specification specifically teaches upregulation of the human CLN3 gene in colon cancer cell lines. Moreover, the declaration by Rose-Mary N. Boustany, M.D. filed March 27, 2006 provides that samples of human colon cancer and normal colon tissue were obtained. The declaration states that CLN3 mRNA expression was measured and compared. The data indicated that CLN3 expression was 50-330% higher than in corresponding normal colon tissue (page 2 of declaration). Thus, the solid tumors and cell lines are correlative and enabling of a method of identifying risk by detecting upregulation of CLN3.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
